CONTENTS

VOLUME 122 • NUMBER 1 • JULY 2003

1 Olaf S. Andersen, David C. Gadsby, and Michael J. Held. *In Memoriam:* Paul F. Cranefield, M.D., Ph.D.

3 Olaf S. Andersen. Editorial

5 Marta López-Fontanals, Silvia Rodríguez-Mulero, F. Javier Casado, Benoit Dérijard, and Marçal Pastor-Anglada. The osmoregulatory and the amino acid-regulated responses of system A are mediated by different signal transduction pathways

17 Nikita Gamper and Mark S. Shapiro. Calmodulin mediates Ca^{2+}-dependent modulation of M-type K^+ channels

33 Andrei Skorinkin, Andrea Nistri, and Rashid Giniatullin. Bimodal action of protons on ATP currents of rat PC12 cells

45 Sujung Ryu, Beiying Liu, and Feng Qin. Low pH potentiates both capsaicin binding and channel gating of VR1 receptors

63 Kwokyin Hui, Deane McIntyre, and Robert J. French. Conotoxins as sensors of local pH and electrostatic potential in the outer vestibule of the sodium channel

81 Konstantin Gusev, Lyuba Glouchankova, Alexander Zubov, Elena Kaznacheyeva, Zhengnan Wang, Ilya Bezprozvanny, and Galina N. Mozhayeva. The store-operated calcium entry pathways in human carcinoma A431 cells: Functional properties and activation mechanisms

95 J. Zhou, G. Brum, A. González, B.S. Launikonis, M.D. Stern, and E. Ríos. Ca^{2+} sparks and embers of mammalian muscle. Properties of the sources

115 Gunther Wennemuth, Donner F. Babcock, and Bertil Hille. Calcium clearance mechanisms of mouse sperm

1*a* Abstracts of Papers at the Fifty-Seventh Annual Meeting of the Society of General Physiologists

47*a* Index to Authors of Abstracts

VOLUME 122 • NUMBER 2 • AUGUST 2003

129 Christopher Miller. *Commentary:* ClC channels: reading eukaryotic function through prokaryotic spectacles

133 Mei-Fang Chen and Tsung-Yu Chen. Side-chain charge effects and conductance determinants in the pore of ClC-0 chloride channels

147 Chia-Wei Lin and Tsung-Yu Chen. Probing the pore of ClC-0 by substituted cysteine accessibility method using methane thiosulfonate reagents

161 Paul K. Kienker, Karen S. Jakes, Robert O. Blaustein, Christopher Miller, and Alan Finkelstein. Sizing the protein translocation pathway of colicin Ia channels

177 Herve Barriere, Radia Belfodil, Isabelle Rubera, Michel Tauc, Florian Lesage, Chantal Poujeol, Nicolas Guy, Jacques Barhanin, and Philippe Poujeol. Role of TASK2 potassium channels regarding volume regulation in primary cultures of mouse proximal tubules

191 Mikko Juusola and Gonzalo G. de Polavieja. The rate of information transfer of naturalistic stimulation by graded potentials

207 Ana Y. Estevez, Randolph K. Roberts, and Kevin Strange. Identification of store-independent and store-operated Ca^{2+} conductances in *Caenorhabditis elegans* intestinal epithelial cells

225 Yu-Wen Lin, Taiping Jia, Anne M. Weinsoft, and Show-Ling Shyng. Stabilization of the activity of ATP-sensitive potassium channels by ion pairs formed between adjacent Kir6.2 subunits

239 Jill Thompson and Ted Begenisich. External TEA block of Shaker K^+ channels is coupled to the movement of K^+ ions within the selectivity filter

VOLUME 122 • NUMBER 3 • SEPTEMBER 2003

247 Peter H. Barry. *Commentary:* The relative contributions of cAMP and $InsP_3$ pathways to olfactory responses in vertebrate olfactory receptor neurons and the specificity of odorants for both pathways

251 Manfred Lindau. *Commentary:* Synaptotagmin function illuminated

255 Hiroko Takeuchi, Yukie Imanaka, Junzo Hirono, and Takashi Kurahashi. Cross-adaptation between olfactory responses induced by two subgroups of odorant molecules

265 Jakob B. Sørensen, Rafael Fernández-Chacón, Thomas C. Südhof, and Erwin Neher. Examining synaptotagmin 1 function in dense core vesicle exocytosis under direct control of Ca^{2+}

277 Alessio Accardi and Michael Pusch. Conformational changes in the pore of CLC-0

295 Sonia Traverso, Laura Elia, and Michael Pusch. Gating competence of constitutively open CLC-0 mutants revealed by the interaction with a small organic inhibitor

307 Rudolf Karch, Friederike Neumann, Bruno K. Podesser, Martin Neumann, Paul Szawlowski, and Wolfgang Schreiner. Fractal properties of perfusion heterogeneity in optimized arterial trees: a model study

323 Wei Xiong, Ronald A. Li, Yanli Tian, and Gordon F. Tomaselli. Molecular motions of the outer ring of charge of the sodium channel: do they couple to slow inactivation?

333 Claudia Basso, Paola Vergani, Angus C. Nairn, and David C. Gadsby. Prolonged nonhydrolytic interaction of nucleotide with CFTR's NH_2-terminal nucleotide binding domain and its role in channel gating

349 Johannes Reisert, Paul J. Bauer, King-Wai Yau, and Stephan Frings. The Ca-activated Cl channel and its control in rat olfactory receptor neurons

365 Ging Kuo Wang, Corinna Russell, and Sho-Ya Wang. State-dependent block of wild-type and inactivation-deficient Na^+ channels by flecainide

375 Correction

VOLUME 122 • NUMBER 4 • OCTOBER 2003

377 Carla M. Pedrosa Ribeiro, Anthony M. Paradiso, Alessandra Livraghi, and Richard C. Boucher. The mitochondrial barriers segregate agonist-induced calcium-dependent functions in human airway epithelia

389 J. Kronengold, E.B. Trexler, F.F. Bukauskas, T.A. Bargiello, and V.K. Verselis. Single-channel SCAM identifies pore-lining residues in the first extracellular loop and first transmembrane domains of Cx46 hemichannels

407 Claudia Kettlun, Adom González, Eduardo Ríos, and Michael Fill. Unitary Ca^{2+} current through mammalian cardiac and amphibian skeletal muscle ryanodine receptor channels under near-physiological ionic conditions

419 R.D. Hamer, S.C. Nicholas, D. Tranchina, P.A. Liebman, and T.D. Lamb. Multiple steps of phosphorylation of activated rhodopsin can account for the reproducibility of vertebrate rod single-photon responses

445 KAJ DJUPSUND, TETSUO FURUKAWA, SYOZO YASUI, and MASAHIRO YAMADA. Asymmetric temporal properties in the receptive field of retinal transient amacrine cells

459 RAMON LATORRE, RICCARDO OLCESE, CLAUDIA BASSO, CARLOS GONZALEZ, FABIAN MUÑOZ, DIEGO COSMELLI, and OSVALDO ALVAREZ. Molecular coupling between voltage sensor and pore opening in the *Arabidopsis* inward rectifier K^+ channel KAT1

VOLUME 122 • NUMBER 5 • NOVEMBER 2003

471 D. ENKVETCHAKUL and C.G. NICHOLS. *Brief Review:* Gating mechanism of K_{ATP} channels: function fits form

481 PETER R. STANFIELD and MICHAEL J. SUTCLIFFE. *Commentary:* Spermine is fit to block inward rectifier (Kir) channels

485 DONGLIN GUO and ZHE LU. Interaction mechanisms between polyamines and IRK1 inward rectifier K^+ channels

501 BRAD S. ROTHBERG, KI SOON SHIN, and GARY YELLEN. Movements near the gate of a hyperpolarization-activated cation channel

511 YUANLIN SONG, JAY THIAGARAJAH, and A.S. VERKMAN. Sodium and chloride concentrations, pH, and depth of airway surface liquid in distal airways

521 SUDHA CHAKRAPANI, TIMOTHY D. BAILEY, and ANTHONY AUERBACH. The role of Loop 5 in acetylcholine receptor channel gating

541 MANANA SUKHAREVA, DAVID H. HACKOS, and KENTON J. SWARTZ. Constitutive activation of the Shaker Kv channel

557 HIROKO TAKEUCHI and TAKASHI KURAHASHI. Identification of second messenger mediating Signal transduction in the olfactory receptor cell

569 DON-ON DANIEL MAK, SEAN M.J. MCBRIDE, NATALIYA B. PETRENKO, and J. KEVIN FOSKETT. Novel regulation of calcium inhibition of the inositol 1,4,5-trisphosphate receptor calcium-release channel

583 DON-ON DANIEL MAK, SEAN M.J. MCBRIDE, and J. KEVIN FOSKETT. Spontaneous channel activity of the inositol 1,4,5-trisphosphate ($InsP_3$) receptor ($InsP_3R$). Application of allosteric modeling to calcium and $InsP_3$ regulation of $InsP_3R$ single-channel gating

605 ZHIWEI CAI, TOBY S. SCOTT-WARD, and DAVID N. SHEPPARD. Voltage-dependent gating of the cystic fibrosis transmembrane conductance regulator Cl^- channel

621 JOHN P. REEVES and MADALINA CONDRESCU. Allosteric activation of sodium–calcium exchange activity by calcium: persistence at low calcium concentrations

641 TSUNG-YU CHEN, MEI-FANG CHEN, and CHIA-WEI LIN. Electrostatic control and chloride regulation of the fast gating of ClC-0 chloride channels

VOLUME 122 • NUMBER 6 • DECEMBER 2003

653 STEVEN BARNES. *Commentary:* Center-surround antagonism mediated by proton signaling at the cone photoreceptor synapse

657 HAJIME HIRASAWA and AKIMICHI KANEKO. pH changes in the invaginating synaptic cleft mediate feedback from horizontal cells to cone photoreceptors by modulating Ca^{2+} channels

673 XIANDI GONG and PAUL LINSDELL. Mutation-induced blocker permeability and multiion block of the CFTR chloride channel pore

689 DAVID M. BROWE and CLIVE M. BAUMGARTEN. Stretch of β1 integrin activates an outwardly rectifying chloride current via FAK and Src in rabbit ventricular myocytes

703 Claudia M. Krispel, Ching-Kang Chen, Melvin I. Simon, and Marie E. Burns. Novel form of adaptation in mouse retinal rods speeds recovery of phototransduction

713 Gábor L. Petheő, Andrés Maturana, András Spät, and Nicolas Demaurex. Interactions between electron and proton currents in excised patches from human eosinophils

727 Anja Müller, Dorothee Günzel, and Wolf-Rüdiger Schlue. Activation of AMPA/kainate receptors but not acetylcholine receptors causes Mg^{2+} influx into Retzius neurones of the leech *Hirudo medicinalis*

741 Amir Broomand, Roope Männikkö, H. Peter Larsson, and Fredrik Elinder. Molecular movement of the voltage sensor in a K channel

749 R. Lane Brown, Leatha L. Lynch, Tammie L. Haley, and Reza Arsanjani. Pseudechetoxin binds to the pore turret of cyclic nucleotide–gated ion channels

761 Irina Kulikovskaya, George McClellan, Jeanne Flavigny, Lucie Carrier, and Saul Winegrad. Effect of MyBP-C binding to actin on contractility in heart muscle

775 David L. Prole, Pedro A. Lima, and Neil V. Marrion. Mechanisms underlying modulation of neuronal KCNQ2/KCNQ3 potassium channels by extracellular protons

795 L. Revell Phillips and Colin G. Nichols. Ligand-induced closure of inward rectifier Kir6.2 channels traps spermine in the pore
